Dear Neighbor,

Did you know that aborted babies from over 20 states are being transported to Haw River to be incinerated with tons of medical garbage? Did you ever think that your community would be one of the nation's hubs for burning "unwanted" children? It's happening.

Four thousand preborn babies are murdered every day in America, and Stericycle, the nation's leading medical waste company, is the "go-to" service for cleaning up after the act – including in Haw River. At 1168 Porter Avenue, Stericycle burns aborted babies and the items used in killing them, and billows their remains throughout the community in clouds of smoke.

Without the help of Stericycle and businesses like it, the abortion industry would collapse. Stericycle is largely responsible for keeping the cycle of death going in our nation by facilitating the collection, transportation and incineration of aborted babies and the items used in their death. Please take a moment to review the enclosed brochure to learn more. This must STOP. *You can help!*

Why is Stericycle able to burn aborted babies in North Carolina?

Current state law says that "unrecognizable" fetuses must be incinerated, and outlines that a baby is only recognizable when it is in the last trimester (7 months and up). Not only is this logic absurd, but it is enabling Stericycle to use Haw River as a virtual Auschwitz for discarded babies.

If state legislators would change the law, or if local officials would enact a regulation prohibiting children from being treated as trash, the incineration of babies in Haw River would end. We urge you to write or call your state legislators as outlined below and express your concerns regarding this horrific and inhumane practice.

Do something! Be a voice for those without one!

Stericycle needs to hear from you! They need to know that as a citizen of Haw River you are appalled that aborted babies throughout the Eastern United States are being shipped to your town, burned to ash and then puffed out through the community in plumes of smoke.

Please call Stericycle plant manager Alan Skrzypczak today at 336-578-8900 (office) or 336-269-2140 (mobile) and kindly, but firmly, express your disgust over what he and Stericycle are doing in Haw River.

Please continue reading on reverse side...

Please also contact the national executives of Stericycle and urge them to stop servicing the abortion industry and profiting off of the blood of innocent preborn children.

President Charles Alutto	847-607-2004	calutto@stericycle.com
CEO Mark Miller	847-607-2038	mmiller@stericycle.com

Additionally, as stated, contacting your state legislators is one of the most effective ways to make an impact. Please express your concerns about regulations in North Carolina that allow preborn babies to be burned as trash in Haw River to the following:

Representative Alice Bordsen	919-733-5820	alice.bordsen@ncleg.net
Representative Dan Ingle	919-733-5905	dan.ingle@ncleg.net
Senator Rick Gunn	919-301-1446	rick.gunn@ncleg.net

About the Campaign to Stop Stericycle

The Campaign to Stop Stericycle (CSS) exists to inform the public about Stericycle's involvement with the abortion industry and to exhort the nation to call upon Stericycle to stop being a part of the village that is working to kill America's children.

CSS has collected an overwhelming amount of evidence linking Stericycle to the abortion industry, and has uncovered sickening truths about the company's collection, transportation and incineration of aborted children. This includes recorded admissions from Stericycle and government documents that certify the use of Stericycle by the abortion industry.

Visit **stopstericycle.com** today to learn more, and to find out about ways that you can join us in the fight!

Sincerely,

Michael Marcavage
Director, Campaign to Stop Stericycle
